Circulatory system of amphioxus pdf

I'm not robot!

Ontobee: A linked data server designed for ontologies. Ontobee is aimed to facilitate ontology data sharing, visualization, query, integration, and analysis. Ontobee dynamically dereferences and presents individual ontology term URIs to (i) HTML web pages for user-friendly web browsing and navigation, and to (ii) RDF source code for Semantic Web applications. Ontobee is the default linked data server for most OBO Foundry library ontologies. Ontobee has also been used for many non-OBO ontologies. Currently Ontobee has been applied for the following ontologies: No. Ontology Prefix Ontology Full Name OBO List of Terms F: Foundry L: Library N: Not Specified/No 1 AEO Anatomical Entity Ontology L 2 AGRO Agronomy Ontology L 3 AISM Ontology for the Anatomy of the Insect SkeletoMuscular system (AISM) L 4 AMPHX The Amphioxus Development and Anatomy Ontology L 5 APO Ascomycete phenotype ontology L 6 APOLLO_SV Apollo Structured Vocabulary L 7 ARO Antibiotic Resistance Ontology L 8 BAO BioAssay Ontology N 9 BCGO Beta Cell Genomics Ontology L 10 BCO Biological Collections Ontology L 11 BFO Basic Formal Ontology F 12 BFO11 Basic Formal Ontology (BFO) 1.1 L 13 BSPO Biological Spatial Ontology L 14 BTO BRENDA tissue / enzyme source L 15 CARO Common Anatomy Reference Ontology L 16 CDAO Comparative Data Analysis Ontology L 17 CDNO Compositional Dietary Nutrition Ontology L 18 CEPH Cephalopod Ontology L 19 CHEBI Chemical Entities of Biological Interest F 20 CHEMINF Chemical Information Ontology L 21 CHIRO CHEBI Integrated Role Ontology L 22 CHMO Chemical Methods Ontology L 23 CIDO Coronavirus Infectious Disease Ontology L 24 CIO Confidence Information Ontology L 25 CL Cell Ontology L 26 CLAO Collembola Anatomy Ontology L 27 CLO Cell Line Ontology L 28 CLO-hPSCreg Cell Line Ontology -
